Liability exposures for fire departments...don't be caught off guard!

An alarming number of firefighters across the country are being charged, injured or even killed while performing duties which were intended to protect the public. This fast paced seminar will explore Fire Service Leaders' roles in protecting our firefighters and EMT's. Fire Service leaders also have an obligation to the firefighters to provide a safe working environment and to the public to protect the interests of the tax payers and to limit liability that may be imposed on the district or department.

This no holds barred seminar will review the leading causes of injury, death and liability issues facing fire service organizations and provide sample policies and procedures to help limit these exposures.

Are you registered for E-Learning?

A great supplement to our hands on training and live presentations is our new E-Learning programs available FREE of charge to clients of McNeil and Company. Our catalogue of online programs provides safety training anytime, anywhere. Its convenient for department members and a great tracking tool for Training Officers!

In order to register and begin taking courses, your organization's training officer must first enroll in the program.

You can [Register Here.](#)
